Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 30days MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-3, 12-23, and 27-40, drawn to a method of controlling reproduction in an oocyte-producing organism using zona pellucida protein.

Group II, claim(s) 1-3, 12-22, 24-26, 28-40, drawn to a method of controlling reproduction in an oocyte-producing organism using DNA encoding zona pellucida protein.

Group III, claim(s) 4-9, 12-23, and 27-29 drawn to a method for treating or preventing a reproductive disorder using zona pellucida protein.

Group IV, claim(s) 4-9, 12-22, 28-29 drawn to a method for treating or preventing a reproductive disorder using DNA encoding zona pellucida protein.

Group V, claim(s) 10-23, 27-29, drawn to a method for controlling behavior in an oocyte-producing organism using zona pellucida protein.

Art Unit: 1632

Group VI, claim(s) 10-22 and 28-29 drawn to a method for controlling behavior in an oocyte-producing organism using DNA encoding zona pellucida protein.

The inventions listed as Groups I-VI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Unity of invention between different categories of inventions will only be found to exist if the specific combinations of inventions are present. Those combinations include:

- 1) A product and a special process of manufacture of said product.
- 2) A product and a process of use of said product.
- 3) A product, a special process of manufacture of said product, and a process of use of said product.
- 4) A process and an apparatus specially designed to carry out said process.
- 5) A product, a special process of manufacture of said product, and an apparatus specially designed to carry out said process.

The allowed combinations do not include multiple products, multiple methods of using said products, and methods of making multiple products as claimed in the instant application, see MPEP § 1850. Groups I-VI represent different methods with distinct uses and purpose.

Each Group contains claims 1-5, 10-21, 23-30, and 32-39, which are generic to a plurality of disclosed patentably distinct species comprising :

Art Unit: 1632

- a) a bird
- b) a fish
- c) a reptile
- d) an amphibian
- e) an insect
- f) an arachnid
- g) an oocyte-producing parasite
- h) rabbit.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Groups III-VI contain claims 4-9, 12-23 and 27 which are generic to a plurality of disclosed patentably distinct species comprising:

- a) egg-binding disease
- b) dystocia
- c) egg-related peritonitis
- d) oophoritis
- e) neoplasia of the reproductive tract
- f) prolapsed oviduct and cloaca
- g) salpingitis
- h) metritis
- i) oviduct impaction
- j) cloacal problems

Art Unit: 1632

- h) cystic hyperplasia
- i) ectopic egg formation
- j) chronic egg laying
- k) peritonitis
- l) neoplasia of the mammary glands.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 1632

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Valarie Bertoglio whose telephone number is 703-305-5469. The examiner can normally be reached on 7:30-4:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Deborah Reynolds can be reached on 703-305-4051. The fax phone numbers for the organization where this application or proceeding is assigned are 703-872-9306 for regular communications and 703-872-9307 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-1234.
